

# CON201 : Architectural Drafting II

This advanced course provides students with practical experience in preparing working drawings for building construction. The class utilizes concepts developed in

[CON130](#)

and

[CON200](#)

utilizing Autodesk's AutoCAD and Civil 3D drafting and documentation software. A complete set of residential working drawings are prepared over the course of the semester. A comprehensive exploration of the architectural process is communicated and advanced drafting and AutoCAD and Civil 3D skills are applied.
